## WFS05 FLASH LIGHT

### MANUAL

Please read the manual carefully before using the video light

### Component

01

### Specifications

Full power guide number at 1m/IOS 100	24
Waterproof	100m
Max. power	80Ws
LED lighting	1 watt spot light and 1 watt red light
Brightness(Lumen)	200 lm ( Wide light )
Color Temperature	6000K ( Wide light )
Flash index level	GN/1/1.4/2/2.8/4/5.6/8/11/16/22/24
Flashes per full charge	Full power is greater than 1200 times
Recycle time	0.1s~1.5s (Depends on greater than flash intensity)
Battery	4*18650Li-ion batteries (3400 mAh)
Size	119 (L)x 119mm(W) x 135.5(H) mm
Weight	1050g on land (Include the battery ) 240g underwater (Include the battery )

### Unpacking

02

### To install the battery

1. Turn the tail cap counter-clockwise to open.
2. Loading the Li-ion battery into the tail cap, make sure the polarity battery must match the polarity of the diving light contacts.

(Adjustment knob A) Rotate clockwise + ;

Wide light: Totally 10 levels from 0 to 100, A level is 10% ;

(Adjustment knob A) Rotate counterclockwise- ;

Wide light: Totally 10 levels from 100 to 0.

04

### Memory function

On normal mode, the current state will be recorded when the machine is shut down, and the same state will be recorded when the machine is turned on again.

### Low power protection

When the battery voltage is too low, all the Buttons are invalid and can only be turned off.

### To Charge the battery

1. Insert the DC charger plug into the battery.
2. Plug the charger into the wall receptacle. When the battery begins to charge the indicator light on the charger will be red.
3. When the battery is fully charged the indicator light on the charger will turn green.

### General Maintenance

There two-rings in the tail cap. Use silicone to keep the O-rings well lubricated. It is important to lubricate the o-rings if the flashlight has not been used in a long time or if the o-ring is hard. If the O-ring is damaged, broken or deformed it should be replaced with the spare.

Note : Do not use a sharp tool to remove the O-rings.

06

### Brightness adjustment (Flash)

On S1/S2 mode ( it does not Flash intensity display synchronization mode) When the gear knob B is rotated to different gears, the guide number will change according to the current gear value to adjust the intensity of the flash.

### Strobe mode

On S1 mode, Flash light flashes when a single flashing signal is received. On S2 mode, Flash light flashes when two flashing signals are received within 1 second. On Sync mode, (it must be connected to fiber optic cable) received flash signal, according to the letter To flash.
